OC-E/SED/FAB

16 June 1975

Secretary, OC Equipment Board

OC Equipment Board Review Requests

- A. OC-E/SED/FAB memo, dated 14 May 1975, regarding the AN-88 H.F. radio receive antenna
- B. OC-E/SED/FAB memo, dated 2 June 1975, regarding the Frederick 1500B H.F. radio receiver

1. The OC Equipment Board has reviewed and unanimously approved the Reference A request to make the AN-88 polarization diversity receive antenna non-SCEL OC standard. In addition, it was also agreed upon that this antenna would only be installed on troublesome H.F. circuits and that the AN-47 and VRA-6 antennas would continue to be procured and installed.

2. The Equipment Board also fully concurred in the Reference B request to retain the Frederick 1500B Receiver in the OC Staff Communications System. The Board also approved the philosophy that the Collins 651S-1 Receiver should only be installed at field stations whose primary transmission means was H.F. radio and that both the Frederick 1500B and the R-390 receivers be installed and/or retained for use at those facilities relying upon H.F. radio for contingency purposes only.
